

STUDENTS SHARING ACROSS THE GLOBE

School of Hope's plans

Currently SoH is completing their new classroom, thanks to funds from Good Shepherd Primary. They need to improve the drainage for rainy seasons.

Sponsorship

We met many students at School of Hope who are in a vulnerable position and may have to stop their schooling. Please consider sponsoring a child.

For more details email: simon@globalschoolpartners.org.au

School of Hope welcomes us

GSP took a team of 5 teachers and 3 health professionals to Kenya in July and we visited schools and provided 2 days of professional development for all the teachers and first aid officers in our partner schools.

The photo above shows some of the students performing a song for us. The students were much better at singing than us, but we tried!

"GSP visits are a joy for the school and the students get very excited to see Simon and the team again" says Moses Ndege, Director of School of Hope.

Jann with Rahabu

Rahabu is a sponsored child who lives with her mother. She would not even be at school if it was not for her sponsor. Very likely Rahabu would be working in a tea plantation picking tea every day. Her sponsorship means she will finish school.

Tree planting by the team

Each member of our team was honoured to plant a tree at School of Hope, as a sign of the relationship, love and journey that the school is on with Good Shepherd.

Unfortunately, it was raining quite hard when we were there and had to all crowd into the library – middle photo.

The nearby stream broke its banks and was running between and behind the classrooms, making it a sea of mud, including in some of the classrooms – this is why they plan to improve their drainage system around the school.
